6 DAYS MIGRATION NORTHERN SERENGETI

In July, the 6-Days wildebeest migration moves north, passing through the Lobo area (area just north of the central Serengeti National Park) and the Wagakuria area (remote northern Serengeti National Park along the Mara River) en-route to Kenya's Masai Mara Game Reserve. The migration can arrive to the Wagakuria area anytime from July onwards and wildebeest can be seen in the area, crossing the Mara River. In September the wildebeest herds are spread out over the northern Serengeti National Park and Kenya's Masai Mara Game Reserve. Several large herds of wildebeest remain behind in the area and sometimes weather changes can bring the herds back into the area from the Mara. In October, the herds move south towards the central Serengeti National Park via the Lobo area of the Serengeti National Park.
